*Life at Flint Hill Elementary School may seem normal, but seven friends find themselves on a path to crack the code for an epic life. Whether they’re chasing their dreams on stage, searching for an elusive monster fish, or running a makeshift business out of a tree house, can these heroes find a way to work together to change their community?*

*When we dream we dream a better, fuller life. There is a reason we dream at night. It’s not random nonsense. When we’re dreaming, we are thinking on a much deeper, more insightful level than when we’re awake. When we’re dreaming, we’re actually problem solving...it’s just in a different language. Our minds are speaking to us in codes: warnings, helping, and guiding us through our constantly evolving situations in life. The mind, through dreams, is trying to alert us to problems it wants fixed. The truth is, our best thinking isn’t done in the shower, it’s done while we dream. In fact, when we say, “Let me sleep on it,” what we’re really saying is, “Let me dream on it.” In this easy-to-use guide, renowned dream analyst Lauri Quinn Loewenberg gives you the tools to interpret the often confounding language of dreams. You will learn how to: \* unlock the hidden dream communications your mind wants you to know \* understand commonly occurring people, places and animals as extensions of your personality \* decipher the real meaning behind nightmares like falling, drowning, and being chased \* discover the big messages in seemingly small dream elements as Lauri guides you through dozens of real-life dreams \* use your dreams as a tool to solve your everyday problems and effect real change in your life and relationships \* reference the most important dream symbols with a comprehensive dream dictionary*

*JEE (Main and Advanced) is one of the toughest examinations in the country in terms of the number of aspirants, the difficulty of the questions and the selection ratio. A student who prepares for JEE faces a tremendous amount of pressure and goes through tight schedules because he/she has to prepare for both Board Exams and JEE simultaneously. Also, infinite numbers of paid/free books, videos and other resources are readily available on both offline and online platforms these days. They usually put the student in a confused state. With many roadblocks and constraints ahead in the journey, a serious aspirant must know how to optimize his/her preparation and performance in the exams. In this book, we share insights and lessons from the experience we have gained over the past several years as successful JEE aspirants ourselves initially, then as IITians who got an opportunity to learn and interact with hundreds of other JEE toppers during our college days at IIT Madras and finally, as JEE Gurus, having successfully trained and guided hundreds of aspirants in the past. This is a must-read book for all students (and their parents alike) who are in high school (and above) and are dreaming to crack JEE (and similar exams) one day.*

*A family doctor shares a mother and father’s determination to save their son. This story of a father’s search to find a diagnosis, and ultimately a cure, for his son’s mystery disease is an inspiration that has set the world of genetic medicine and research abuzz with the possibilities for the future. After Cracking the Code screened on “Australian Story,” Stephen Damiani and his extraordinary ordinary family have been inundated with messages of support for Mission Massimo. Stephen has a background in construction economics and risk management. He teamed with geneticist Ryan Taft to map his family’s genome in an attempt to discover the cause of his son’s illness, and in the process developed a diagnostic tool that will revolutionize diagnoses and treatments of diseases as complex and rare as Massimo’s leukodystrophy to widespread diseases such as diabetes and cardiovascular disease. Previously, trying to find a specific gene mutation that might be responsible for a disease was a million times harder than finding a needle in a haystack. Stephen’s suggestion that Ryan align the genomes, or DNA blueprints, of himself, his wife Sally as well as Massimo, to find any unique variations and thereby create a smaller haystack was previously unknown. With Massimo’s neurologist, Dr. Rick Leventer at Melbourne’s RCH, that it was just a case of technology, statistics, data, and money, but that it could be done. Once Taft was able to locate and isolate the specific genetic mutation of Massimo’s DARS gene, the hunt was on to find other children with the same genetic mutation so that the diagnoses could be confirmed. With the help of Adeline Vanderver at the Washington DC-based Centre for Genetic Medicine and her Myelin Disorders Program, they were able to locate several other children with the DARS mutation and have now moved on to the next phase of Mission Massimo, finding a cure. Cracking the Code is simultaneously a wonderful family memoir and the story of some mind-blowing discoveries in medicine. The award-winning New York Times bestseller about the American women who secretly served as codebreakers during World War II—a “prodigiously researched and engrossing” (New York Times) book that “shines a light on a hidden chapter of American history” (Denver Post). Recruited by the U.S. Army and Navy from small towns and elite colleges, more than ten thousand women served as codebreakers during World War II. While their brothers and boyfriends took up arms, these women moved to Washington and learned the meticulous work of code-breaking. Their efforts shortened the war, saved countless lives, and gave them access to careers previously denied to them. A strict vow of secrecy nearly erased their efforts from history; now, through dazzling research and interviews with surviving code girls, bestselling author Liza Mundy brings to life this riveting and vital story of American courage, service, and scientific accomplishment.*

*Since the terrorist attacks of September 2001, surveillance has been put forward as the essential tool for the ‘war on terror,’ with new technologies and policies offering police and military operatives enhanced opportunities for monitoring suspect populations. The last few years have also seen the public’s consumer tastes become increasingly codified, with ‘data mines’ of demographic information such as postal codes and purchasing records. Additionally, surveillance has become a form of entertainment, with ‘Reality’ shows becoming the dominant genre on network and cable television. In The New Politics of Surveillance and Visibility, editors Kevin D. Haggerty and Richard V. Ericson bring together leading experts to analyse how society is organized through surveillance systems, technologies, and practices. They demonstrate how the new political uses of surveillance make visible that which was previously unknown, blur the boundaries between public and private, rewrite the norms of inclusion and exclusion, and alter processes of democratic accountability. This collection challenges conventional wisdom and advances new theoretical approaches through a series of studies of surveillance in policing, the military, commercial enterprises, mass media, and health sciences.*

*What sets this book apart is the fact that it is not just another science book describing scientific facts and phenomena! It would surely be redundant since that task has been done many times over with much more elegant prose and brighter narrators. In this book, for the first time we have undertaken the task of breaking the code of any piece of matter or natural phenomena; whether it is an atom, a quantum occurrence, a planet, a galaxy, or any other perceivable thing. It covers any natural phenomena ever discovered or one that will be unravelled by the future pioneers in their respective fields. This book provides the trail map of any and all things that man has discovered and shows how their codes were cracked. The list of discoveries is endless but prominent amongst them are the discovery of fire, electricity, magnetism, laws of motion, the solar system and planets, so on and so forth. This book goes beyond just pure science since it fuses philosophy with science. It actually makes science a subset of philosophy, or more precisely, applied philosophy. Just like the light phenomenon, which was made to be a subset of the field of electricity by James Clerk Maxwell, revolutionizing our technical world, so does this book by bringing a new era of incredible developments for mankind!*

*“This fascinating little volume explores the stuff that dreams are made of and the role the pandemic is playing in them. The dreams from Barrett’s survey are riveting vignettes--from terrifying to touching to hilarious. Her decades of scientific research and clinical practice inform incisive commentary on what these dreams reveal about society’s response. She offers simple exercises for managing anxieties over COVID-19 and for inspiring adaption in this unique period of history. A great read!” -Amy Tan, author of The Joy Club DREAM: I looked down at my stomach and saw dark blue stripes. I “remembered” these were the first sign of being infected with COVID-19. DREAM: My home was a Covid-19 test center. People weren’t wearing masks. I’m taken aback because I wasn’t asked to be a test site. I’m worried that my husband and son (who actually lives out of state) will catch it because of my job as a healthcare worker. DREAM: I was a giant antibody. I was so angry about COVID-19 that it gave me superpowers, and I rampaged across all the virus I could find. I woke so energized! Since the COVID-19 pandemic swept around the world, people have reported unusually a vivid and bizarre dream lives. The virus itself is the star of many--literally or in one of its metaphorical guises. As a dream researcher at Harvard Medical School, Deirdre Barrett was immediately curious to see what our dream lives would tell us about our deepest reactions to this unprecedented disaster. Pandemic Dreams draws on her survey of over 9,000 dreams about the COVID-19 pandemic. She describes how dreaming has reflected each aspect of the pandemic: fear of catching the virus, reactions to sheltering at home, work changes, homeschooling, and an individual’s increased isolation or crowding. Some patterns are quite similar to other crises Dr. Barrett has studied such as 9/11, Kuwaitis during the Iraqi Occupation, POWs in WWII Nazi prison camps, and Middle Easterners during the Arab Spring. There are some very distinctive metaphors for COVID-19, however: bug-attack dreams and ones of invisible monsters. These reflect that this crisis is less visible or concrete than others we have faced. Over the past three months, dreams have progressed from fearful depictions of the mysterious new threat . . . to impatience with restrictions . . . to more fear again as the world begins to reopen. And dreams have just begun to consider the big picture: how society may change. The book offers guidance on how we can best utilize our newly supercharged dream lives to aid us through the crisis and beyond. It explains practical ways for dream interpretation, reduction of nightmares, and incubation of helpful, problem-solving dreams. It also examines the larger arena of what these collective dreams tell us about our instinctive, unconscious responses to the threat and how we might integrate them for more livable polities through these times. Deirdre Barrett, PhD is a dream researcher at Harvard Medical School. She has written five books including Pandemic Dreams and The Committee of Sleep, and edited four including Trauma and Dreams. She is a frequent speaker at conferences.*

*Is the financial plan of mediocrity—a dream-stealing, soul-sucking dogma known as “The Slowlane” your plan for creating wealth? You know how it goes: It sounds a lil something like this: “Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich.” The mainstream financial gurus sold you blindly down the river to a great financial gamble: You’ve been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair—sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on waves of HOPE. HOPE you can find a job and keep it. HOPE the stock market doesn’t tank. HOPE the economy rebounds. HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family’s financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you need most, versus what you can. For those who don’t want a lifetime subscription to “settle-for-less” and a slight chance of elderly riches, there is an alternative: an expressway to extraordinary wealth can burn a trail in financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young, Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of “do what you love” will most likely keep you poor, not rich. And 250+ more poverty busting distinctions...Demand the Fastlane, an alternative road-to-wealth: one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.*

*The Wall Street Journal called it, “Team USA’s management victory . . . a group-dynamic philosophy with lessons for golf and beyond.” With only three wins in twenty-five years for the United States Ryder Cup team, 2008 captain Paul Azinger employed a management style that focused on building strong relationships among the players. The resulting team won with the largest U.S. margin of victory in almost three decades. In Cracking the Code, Azinger and management consultant Ron Braund share the team-building philosophy that helped win the Ryder Cup and can work for you. “Zinger brought a very systematic approach. How we practiced and how we played matches with.” The most stressful part of Ryder Cup week is always the uncertainty, but his system went a long way toward putting everyone at ease.”--Stewart Cink, 2002, 2004, 2006, and 2008 U.S. Ryder Cup teams “We all bought into the pod strategy, then Paul set the tone by giving us ownership, and it worked.”---Phil Mickelson 1995, 1997, 1999, 2002, 2004, 2006, and 2008 U.S. Ryder Cup teams “We all bought into the pod strategy, then Paul set the tone by giving us ownership, and it worked.”---Phil Mickelson 1995, 1997, 1999, 2002, 2004, 2006, and 2008 U.S. Ryder Cup teams “We all bought into the pod strategy, then Paul set the tone by giving us ownership, and it worked.”---Phil Mickelson 1995, 1997, 1999, 2002, 2004, 2006, and 2008 U.S. Ryder Cup teams The United States Ryder Cup team ended nearly a decade of European dominance in 2008 by laying aside their individual pursuits for a single week and bonding like brothers on golf’s greatest stage. Inspired by team-building techniques from Navy SEALs, Ryder Cup Captain Paul Azinger divided the twelve-man team into small groups, or pods. With guidance from corporate team-builder and relationship specialist Dr. Ron Braund, he placed golfers in pods based on their personality types rather than their golf games. The relationships among teammates created an atmosphere where Phil Mickelson, Jim Furyk, Stewart Cink, Kenny Perry, and the other U.S. golfers could perform at their highest levels. Cracking the Code tells the compelling story of how the U.S. team, half of them Ryder Cup rookies, overcame their underdog status to bring the Cup back to American shores. In the telling, they reveal principles that can be used to build winning teams in sports, business, and all of life.*

In recent years deliverance ministry has become increasingly difficult. Even the most seasoned ministers struggle to locate and expel demons. Individuals think they're free from demonic bondage only to be blindsided by another oppressive force. But for New York pastor Alexander Pagani, one experience changed everything. He realized how demons lodge themselves in hidden areas of our lives. First, a demon can quite literally reside in an area of the body. Second, demons can live deep in the soul and remain undetected. Deliverance is like a labyrinth with trap doors, backward stairs, and secret rooms.
